CRAYLER F3 ALL-WHEEL-DRIVE

All-wheel drive for demanding duty

With the CRAYLER F3 forklift, customers have a proven all-wheel-drive series from PALFINGER Company at their disposal. The high-performance all-wheel-drive system makes the CRAYLER F3 equally at home on concrete or off-road surfaces for deliveries right to the customer's door.

The F3 all-wheel-drive shares the CRAYLER quick deployment quality, dismantled and ready to use in less than a minute. Once in operation the fast ground speed and function operation combined with the superb operator visibility mean loads can be quickly taken from transport vehicle to delivery destination.

The range of equipment options available for the F3 all-wheel-drive makes the applications for this machine almost endless. Whether moving building materials, gas bottles, recycling material or in general haulage the F3 all-wheel-drive is a machine that can work as hard as you.

CRAYLER CR

the strong rear-mounted forklift with retractable-mast system

The CRAYLER CR range is designed for the operator who needs serious terrain ability. Delivering to the toughest building sites is no obstacle for the powerful engine and unequalled drive system. This machine accepts the customer's requirements and delivers with consummate ease.

Designed to the ANSI standards and FOPS & ROPS tested, the forklift from PALFINGER Company meets all the safety requirements and also offers the user best-possible operating convenience.

As with the whole CRAYLER range, the CR has built in reliability. Only the best components are selected by PALFINGER, with parts vigorously tested to the equivalent of years of working use. Further reliability is gained through the enclosed chassis protecting any vulnerable areas from mud or foreign object damage.

PALFINGER CRAYLER assembly plant at Köstendorf

Development, production and distribution are certified to EN ISO 9001:2000

CRAYLER BM

the clever transportable forklift

With their multifunctional capabilities forklifts from CRAYLER open up previously unknown possibilities in short- and medium-haul transport – a fact that applies most particularly to the CRAYLER BM or „Box Mounted“ range. The BM is transported in a box between the axles of the carrying vehicle giving the forklift total protection from the dirt and weather-related problems of road transport.

The CRAYLER BM with its two or four-wheel drive options enable the operator to provide a service previously not available. Whether delivering up narrow pathways or across delicate grass surfaces the BM brings a new level of customer service.

Due to the position of the transport box, the vehicle displays a high level of stability and safety as a result of optimal weight displacement. The setup time of only 30 seconds permits easy and efficient loading and unloading within the shortest time. The box door is simply folded down and the BM emerges ready for work.

The controls of the CRAYLER BM allow the operator to stand in the best possible position for vision and safety, a great advantage when delivering in confined or pedestrian areas.

ARGUMENTS THAT SPEAK FOR THEMSELVES

■ **Open-view mast**
Best possible overview
on any job

■ **KTL cathodic paint system**
Best corrosion protection
through dip painting and
powder coating

■ **Central seat**
High safety and comfort
through centrally
positioned seat

■ **Operation**
Ergonomically
arranged controls

■ **Drive system**
High-performance drives
guarantee efficient working
and a long service life

■ **Compact design**
Low dead weight and
compact design,
well protected and yet easily
accessible components

■ **Service**
Easy and time-saving
maintenance,
worldwide service net-
work for PALFINGER
customers

■ **Directly flanged pumps**
Reliable and
sturdy technology

The forklifts shown are in some cases fitted with specifically requested equipment and do not always represent the standard versions. Country-specific regulations must be observed for assembly of the forklift. Measurements stated are not binding. Subject to technical changes.

CRAYLER F3

the powerful rear-mounted forklifts can handle any challenge

The F3 forklifts from PALFINGER are compact in design while strong in work. This is a machine that is both suited to small multi-drop deliveries or tough prolonged employment. Specification options allow the machines to range from the small to the powerful providing a machine perfect for urban deliveries.

As with all CRAYLER forklifts, the F3 benefits from careful steering design giving the operator full lock in either direction, ideal for manoeuvring in narrow streets. Busy areas demand safety, and the F3 responds with the centre driving position providing optimum protection and visibility for the driver.

Even when mounted the F3 shows further benefits to the urban operator. A small rear overhang means the carrying vehicle can pass through the city streets unrestricted, while the low dead weight allows the transport vehicle to retain all its good handling characteristics.
